

January Monthly Meeting

Welcome to 2010 and I hope everyone had a Merry Christmas and a Happy New Year. I have to apologize for being late with this month's newsletter, as I had a personal injury which prevented me from getting this out sooner.

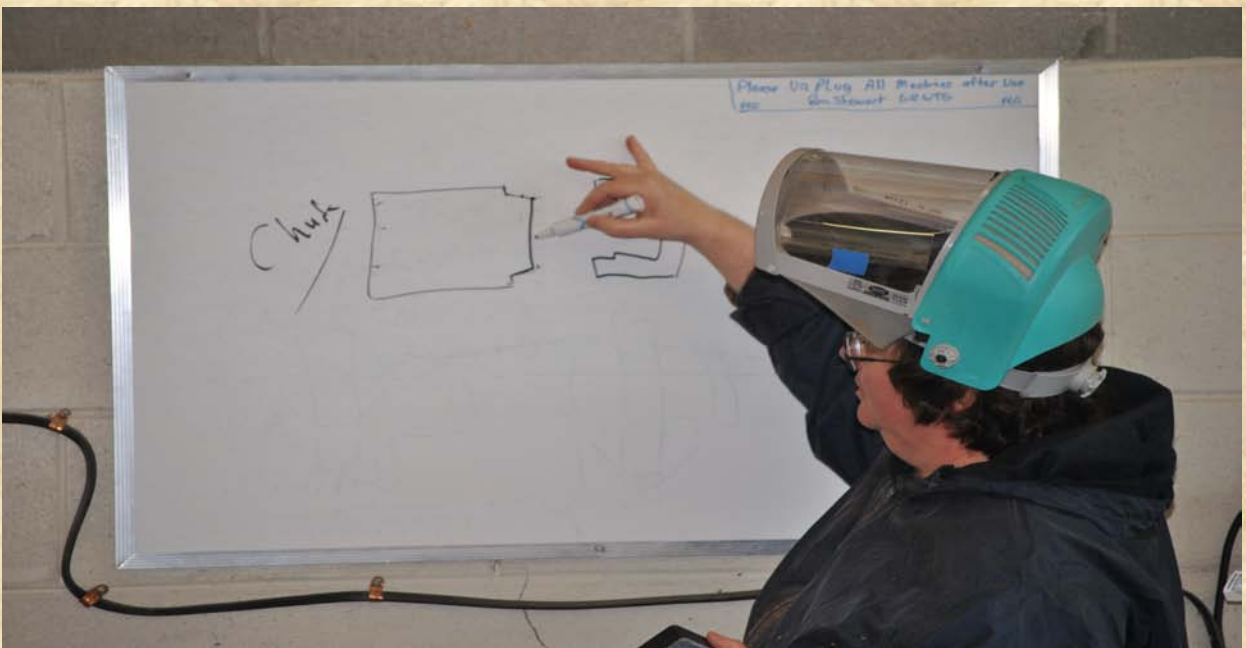

The month of January brought the members some new turning techniques, which Peggy Wharrick demonstrated. Peggy presented us with a few techniques that she was shown by Bruce Campbell during his last visit.

During the demonstration the members were shown the various uses of chisels with particular attention to the use of a bedan chisel.

During the demonstration Peggy explains the importance of making precise cuts and checking the dimensions repeatedly in order to have the lid and box fit properly.

Here are some of the fine works Peggy has completed for the snap lid boxes.

On display at the monthly meeting there were numerous other fine turnings such as bowls, lidded boxes, a plate, some homemade tools and an egg.

February's meeting will be held on the 20th where Ron Stewart will provide us with a turning demonstration.

The following pictures are contributions some of the members brought to the monthly meeting for viewing.

GREY Lidded boxes by Carl Durance.
